Product Information

Model
Serial Number

I confirm that the item(s) referenced by serial number(s) are free from harmful or potentially harmful substances. This declaration has been filled out correctly and completely, and signed by authorized person(s).

Before returning any equipment that has been exposed to contamination, you MUST DECONTAMINATE it in accordance with an established procedure approved by a Government who is a member of the World Health Organization. Equipment must be free from any chemical, biological, radioactive, toxic, corrosive or infectious contamination. Intelagard will not accept any returned equipment unless it is accompanied by a completed Declaration of Decontamination. This completed document must always be faxed in advance to Intelagard and the original must be included inside the packing box. Any chemical, biological, radioactive, toxic, corrosive or infectious materials that the equipment may have been exposed to must be noted in the Declaration of Decontamination as well as the detailed method of cleansing and decontamination. Returned equipment will be kept on hold status or returned to sender until the required documentation is received by Intelagard.

Reason For Return:

Has this equipment been used? Please select the appropriate box.

No - Still in original packaging

No - Unpacked but not used
