

Crystal Clean® ILLICIT LAB DECONTAMINATION

Introducing a powerful commercial decontaminant for high-risk exposure environments. Crystal Clean® is engineered to isolate, capture and lift surface contaminants such as methamphetamines, fentanyl, carfentanyl and other toxic residuals found in clandestine labs.

One and Done

Other solutions require **multiple** cleanings. Crystal Clean® can reduce trace contaminants to less than .02 µg/100 square cm* — which is considered undetectable — after **one use**. Eliminate the need for additional cleaning solutions and remediate in one labor-saving step.

INTELAGARD® YEARS

Innovative. Efficient. Reliable.

The Solution is Crystal Clear

Get Crystal Clean®

When meth and other drugs are “cooked”, nothing escapes contamination. Remediators can rely on Crystal Clean® to attack and neutralize most hazardous chemicals with as little as one application. Use as a foam for ultimate surface coverage and saturation.

Simple and Efficient

3-PART FORMULATION

Crystal Clean® has 3 separate components that when combined, target contaminants and detach them from surfaces. This powerful formula uses surfactants and mild oxidizers to attack VOC's, toxic chemicals, and hazardous chemical residues.

Versatile Use

FOR USE WITH:

- Compressed Air Foam Systems
- Foggers
- Pump Sprayers
- Mop & Bucket

“If you haven’t tried Crystal Clean®, we highly recommend comparing it to the way you currently decontaminate any meth lab contaminated property. You’ll be impressed as we were with the results and your increased profit margin.”

-Donetta J. Held
President of Crisis Cleaning

Want it Pristine? Use Crystal Clean®

IDEAL FOR A VARIETY OF ENVIRONMENTS

- ✓ Clandestine Labs
- ✓ Homes & Partial Labs
- ✓ RV's & Vehicles
- ✓ Hotels & Motels
