Running Fuel Fires

PYROCOOL GREEN

Pyrocool is the premier multipurpose firefighting foam available today. Used effectively against fires involving all types of Class B flammable liquids, including unleaded gasoline with additives as well as on highly volatile hydrocarbons (jet fuel) and Electric Vehicle fires.

OUTSTANDING PERFORMANCE

Ultra-Violet absorbers

Surfactants

Endothermic reaction

Pyrocool contains two powerful ultra-violet absorbers. These chemicals absorb the high-energy emissions from a fire, which are most able to spread fire, and re-emit them at longer lower-energy wavelengths.

The result is not only extinguishing the fire, but rapidly cooling the fire source as well as any heat radiating materials; including but not limited to metal.

Packaging Available

5 - Gallon Pail

Part # 46191606-V085

55 - Gallon Drum

Part # 46191606-V766

275 - Gallon Tote

Part # 46191606-V793
